

Everus Construction Group, Inc.
Conflict Minerals Report For
The Year Ended December 31, 2025

Introduction

This Conflict Minerals Report (the “Report”) has been prepared pursuant to Rule 13p-1 under the Securities Exchange Act of 1934 (the “Rule”), for the reporting period from January 1 to December 31, 2025.

The Report relates to the process undertaken by Everus Construction Group, Inc. (herein referred to as “Everus,” the “Company,” “we,” “us,” or “our”) with respect to products that were manufactured, or contracted to be manufactured, during calendar year 2025 and that contain columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives, which are limited to tantalum, tin, and tungsten for purposes of this Report (collectively, the “Conflict Minerals”).

Third-party products that we sell but do not manufacture or contract to manufacture are outside the scope of this Report.

Forward-Looking Statements

This Report may contain certain “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Rule. All statements that reflect our expectations, assumptions or projections about the future, other than statements of historical facts, including, without limitation, statements relating to our intended improvement efforts to mitigate risk, are considered forward-looking statements. The words “believe,” “expect,” “estimate,” “could,” “should,” “would,” “intend,” “may,” “plan,” “predict,” “seek,” “anticipate,” “project” and similar expressions generally identify forward-looking statements, which speak only as of the date the statements were made.

The matters discussed in these forward-looking statements are subject to risks, uncertainties and other factors that could cause actual performance to differ materially from what is projected, anticipated or implied in the forward-looking statements. Although we believe that the expectations reflected in any forward-looking statements we make are based on reasonable assumptions as of the date they are made, we can give no assurance that the expectations will be attained and it is possible that actual performance may differ materially from those indicated by these forward-looking statements due to a variety of risks and uncertainties. These forward-looking statements are made only as of the date of this Report, and we do not undertake any obligation, other than as may be required by law, to update or revise any forward-looking or cautionary statements to reflect changes in expectations, assumptions or the occurrence of events, unanticipated or otherwise.

Company and Products Overview

The Company, through its wholly owned subsidiary Everus Construction, Inc. (“Everus Construction”), provides electrical and mechanical and transmission and distribution contracting services. Everus Construction, and through its wholly owned subsidiary Wagner-Smith Equipment Co., manufactures construction equipment consisting of electric transmission line pullers, tensioners, reel stands, reel carriers, and electric transmission pole and material trailers (the “Construction Equipment”).

Based upon our internal assessment, certain of the Construction Equipment products that are either manufactured or contracted to be manufactured by Everus Construction contain Conflict Minerals that are necessary to the functionality or production of the product.

Conflict Minerals Program

Our Conflict Minerals program has been developed in conformity with the Organisation for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (Third Edition), and related Supplement on Tin, Tantalum, and Tungsten, and Supplement on Gold (collectively, the “OECD Guidance”), specifically as it relates to our position in the minerals supply chain as a “downstream” purchaser.

Reasonable Country of Origin Inquiry

We have conducted a reasonable country of origin inquiry (an “RCOI”) regarding the Conflict Minerals purchased by the Company that was reasonably designed to determine whether any such Conflict Minerals originated in the Democratic Republic of the Congo or adjoining countries (collectively, the “Covered Countries”) or were from recycled or scrap sources. We identified 80 suppliers that provided components or engaged in manufacturing activities for use in our Construction Equipment products during calendar year 2025 that may contain Conflict Minerals. In February 2026, we contacted these suppliers and provided them with a copy of our Conflict Minerals Policy, the Responsible Minerals Initiative (“RMI”), Conflict Minerals Reporting Template (the “Template”), and an instructional letter to assist them in completing their responses. The Template includes questions regarding a supplier’s applicable policy, engagement with its direct suppliers, and a listing of the smelters and refiners the supplier and its suppliers use. In addition, the Template contains questions about the origin of Conflict Minerals included in the supplier’s products, as well as the supplier’s due diligence processes. We requested responses by April 1, 2026, and conducted multiple follow-ups by email with the suppliers that did not respond to the initial request.

Based on the results of the RCOI, we had reason to believe that Conflict Minerals in our Construction Equipment products may have originated in the Covered Countries. As a result, we exercised due diligence on the source and chain of custody of the Conflict Minerals as described below.

Design of Due Diligence

Our Conflict Minerals due diligence measures have been designed to conform to the due diligence-related steps of the OECD Guidance, as applicable for a “downstream” purchaser.

Due Diligence Measures Performed

Below is a description of the measures we performed to exercise due diligence on the source and chain of custody of the necessary Conflict Minerals contained in our Construction Equipment.

- We sent our suppliers a letter that included a copy of our Corporate Conflict Minerals Policy, the RMI, the Template, and instructions, and requested that they complete and return the Template.
- We requested that our suppliers adopt and communicate their Conflict Minerals policies and sourcing expectation to their suppliers and request that they complete the Template.
- We followed up by written correspondence with our suppliers that failed to complete and return the Template and solicited additional information.
- We reviewed all received supplier Templates for completeness. Suppliers that did not provide complete information or provided information that we identified as potentially inaccurate were requested to take corrective actions and update their Template responses.
- We compared smelters identified in supplier Templates against the list of smelters that have committed to undergo a Responsible Minerals Assurance Process (an “RMAP”) audit by RMI and the list of smelters that have received a “conformant” designation under the RMAP.
- We made our Conflict Minerals Report available on our website at <https://everus.com/about-everus/corporate-responsibility>.

Due Diligence Results

For reporting year 2025, we surveyed 80 suppliers of materials for our Construction Equipment using the Template. Of the suppliers surveyed, 64 percent (51 suppliers) responded to our request for information. We have relied on these suppliers’ responses to provide us with information about the source of Conflict Minerals contained in the components supplied to us. Our direct suppliers’ responses are similarly reliant upon information provided by their suppliers.

As the result of our due diligence, we have gathered 376 smelter names from our supply chain. See Annex 1 for the names and locations of such smelters. Of these, 212 have been designated as conformant under the RMAP. An additional 9 are active facilities that have committed to undergo a RMAP audit. Of the 155 remaining reported smelters, all 155 have been determined to be legitimate processing facilities by the RMI and have been allocated a Smelter Identification CID number.

We requested mine or location of origin information for the necessary Conflict Minerals from each of our suppliers using the Template. Many of our suppliers were unable to obtain reliable mine or location-of-origin data for their necessary Conflict Minerals.

Seven smelters, including Gasabo Gold Refinery Ltd, Luna Smelter, Ltd., and PowerX Ltd. in Rwanda, Mining Minerals Resources SARL in the Democratic Republic of the Congo, African Gold Refinery and Woodcross Smelting Company Limited in Uganda, and GG Refinery Ltd. in the United Republic of Tanzania, were identified by some of our suppliers as having their location/s in a Covered Country. GG Refinery Ltd., Luna Smelter, Ltd., Mining Minerals Resources SARL, PowerX Ltd., and Woodcross Smelting Company Limited are listed as conformant smelters by the RMI, while African Gold Refinery and Gasabo Gold Refinery Ltd are not currently listed as conformant or having an active facility by the RMI.

Determination

Based on our due diligence efforts, we do not have sufficient information to conclusively determine the countries of origin of the Conflict Minerals in our Construction Equipment or whether the Conflict Minerals are from recycled or scrap sources. On the basis of the due diligence measures described in this Report, we are unable to rule out that some of the Conflict Minerals used in our Construction Equipment products may have originated in the Covered Countries and are not from recycled or scrap sources, but we have not identified any instances in which our sourcing of necessary Conflict Minerals directly or indirectly financed or benefited armed groups in the Covered Countries.

We have provided information as of the date of this Report. Subsequent events may affect our future determinations under the Rule.

Future Due Diligence Measures

As we continue to work to enhance our due diligence program, we intend to take the following steps, among others, to continue to mitigate the risk that the necessary Conflict Minerals in our Construction Equipment could benefit armed groups in the Covered Countries:

- Track and add new suppliers to our Conflict Minerals program as they enter our supply chain; and
- Drive our suppliers to obtain current, accurate, and complete information about their smelters and refiners of Conflict Minerals.
